

AMENDMENTS TO THE SPECIFICATION:

Please replace paragraph [0038] with the following amended paragraph:

[0038] On the outside of the carrier layer 11, which will constitute the outside wall of a packaging container produced from the packaging laminate, is applied at least one layer 16 of a heat-sealable olefin polymer, preferably a low density polyethylene (LDPE) or a linear low density polyethylene (LLDPE), which include also so-called metallocene-catalysed LLDPE's (m-LLDPE), i.e. LLDPE polymers catalysed by means of a single site catalyst. Other examples of alternative polymers for the outside packaging wall layer may be medium high density polyethylene (MDPE) (~~MOPE~~) or polypropylene (PP).
